

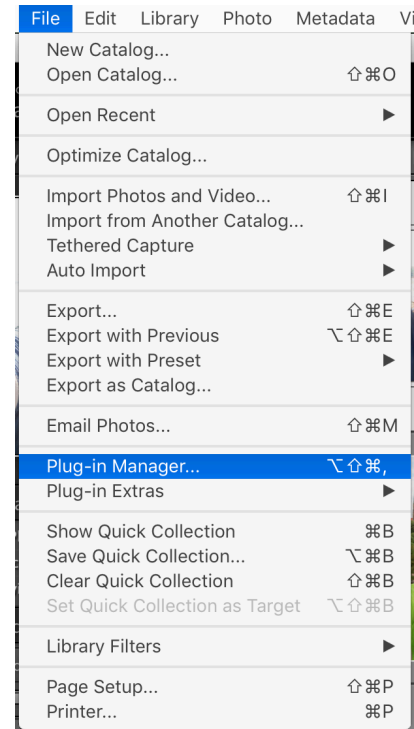

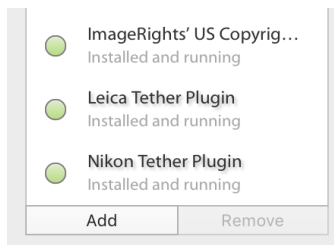

ImageRights' US Copyright Office Registration plugin for Adobe Lightroom

Installation Instructions

Mac

1. Download and unzip the plugin file.
2. Move the "ImageRights.lrplugin" file to a convenient location.
3. Start Adobe Lightroom.
4. Select "File" -> "Plugin Manager..." in the menu. (See picture to the right)
5. Check if you can already spot the ImageRights' US Copyright Office Registration plugin in the list on the left side. If our plug-in is there and the dot next to it is green, then you already have our plug-in installed :)

6. If the plug-in is not yet in the list, click the "Add" button below the list and select the "ImageRights.lrplugin" file you moved in step 2.
7. Now you should see the ImageRights plugin in the list next to a green dot. If that's the case, then the installation was successful :)
8. Close the Plugin Manager with the "Done" button in the bottom right corner.
9. Now it's time to try out the plugin by selecting "File" -> "Export..." in the menu and then selecting "ImageRights' US Copyright Office Registration plugin" in the "Export To:" drop-down at the top of the window.

ImageRights' US Copyright Office Registration plugin for Adobe Lightroom

Installation Instructions

Windows

1. Download and unzip the plugin file.
2. Move the "ImageRights.lrplugin" folder to a convenient location.
3. Start Adobe Lightroom.
4. Select "File" -> "Plugin Manager..." in the menu. (See picture to the right)
5. Check if you can already spot the ImageRights' US Copyright Office Registration plugin in the list on the left side. If our plug-in is there and the dot next to it is green, then you already have our plug-in installed :)
6. If the plug-in is not yet in the list, click the "Add" button below the list and navigate to the folder where you moved the "ImageRights.lrplugin" folder in step 2.
7. Select that "ImageRights.lrplugin" folder, but don't open it and then click "Select Folder" in the bottom right corner.
8. Now you should see the ImageRights plugin in the list next to a green dot. If that's the case, then the installation was successful :)
9. Close the Plugin Manager with the "Done" button in the bottom right corner.
10. Now it's time to try out the plugin by selecting "File" -> "Export..." in the menu and then selecting "ImageRights' US Copyright Office Registration plugin" in the "Export To:" drop-down at the top of the window.
